Version Date: 1 September 2015

The Harvard School of Public Health, the Community Empowerment Lab, and PSI are working with the Government of Uttar Pradesh and your facility to study the effect of WHO Safe Childbirth Checklist program in improving care of mothers and newborns. We would like to ask you some questions about providing care to mothers and newborns around the time of childbirth. This survey is part of a research study and taking the survey is voluntary.

If you agree to participate in this part of the research study, please complete this short survey questionnaire. The questions are not mandatory: you may choose not to answer some or all of the questions. You will not put your name on the survey. No one will know whether or not you answered any of the questions or what your answers were. If you choose to not complete the survey, it will have no effect on your job and no one will know that you refused. Please put the survey in the box whether or not you answered any questions.

If you have any questions regarding the project or would like a copy of the survey you can contact:
